What's next?

I'm passionate about the world of machine learning and I would like to delve into the topic. I'm excited to learn about this constantly evolving technology, and in the near future, I would love to work on projects involving artificial intelligence.

Most Recent Projects

Intranet, project for Government Institution CFE TEIT

Platform designed to integrate multiple areas of the company, from finance to operations, allowing real-time data management and process tracking.

I collaborated as: **Full Stack Developer**

URL: <https://intranet.cfeteit.gob.mx>

Stack programming:
